Profile

Full-Stack Developer with hands-on experience in building scalable web applications, AI-powered enterprise platforms, and modern frontend/backend systems. Skilled in ReactJS, Next.js, NestJS, Python, and Snowflake. Experienced in developing authentication systems, admin panels, knowledge platforms, and AI-driven workflows. Strong ability to deliver responsive UIs, robust APIs, and high-performance applications.

Professional Experience

02/2025 – Present Chennai, India	Full-Stack Developer <i>ConceptVines</i> • Developed authentication and authorization systems with secure role-based access control for enterprise applications • Built admin panels, knowledge base platforms, and graph visualization modules using ReactJS, Next.js, and TypeScript • Developed AI-powered workflow systems such as proposal generation and validation platforms • Contributed to FOX application frontend with dashboards for monitoring validation results and exceptions • Designed scalable backend APIs using FastAPI, NestJS, PostgreSQL, and Snowflake • Improved UI responsiveness and overall application performance
11/2024 – 02/2025 Bangalore, India	Full-Stack Developer <i>ZautoAI</i> • Developed responsive UI components and backend APIs using ReactJS, Node.js, and SQL • Worked with cross-functional teams to improve scalability and user experience
09/2023 – 05/2024 Coimbatore, India	Python Developer Intern <i>Aggregate Intelligence</i> • Built web scraping and automation workflows using Selenium, BeautifulSoup, and Requests • Worked with MySQL and MS SQL for structured data handling and automation pipelines

Skills

Frontend

ReactJS, Next.js, AngularJS, TypeScript, JavaScript, HTML5, CSS3, Tailwind CSS

Databases

PostgreSQL, MySQL, MongoDB, Redis, Snowflake

Backend

Python, NestJS, FastAPI, Node.js, REST APIs, Java (Spring boot)

Tools

Git, GitHub, Postman, VS Code

Projects

09/2025 – Present

FOX (Find Outliers and Exceptions)

A system designed to detect discrepancies and identify root causes.

- Designed and developed a system to detect discrepancies between legacy and modern systems, enabling efficient identification of data inconsistencies and root cause analysis.
- Built scalable and high-performance REST APIs using FastAPI to compare datasets, process exceptions, and automate discrepancy detection workflows.
- Integrated Azure Key Vault for secure configuration and secret management.
- Developed responsive frontend components using Next.js to visualize detected exceptions, monitor system differences, and support user-driven analysis.

04/2025 – 05/2025

Intel Enterprise Platform

AI-powered enterprise platform

- Built knowledge base system with NLP-based search and document management
- Developed graph visualization for enterprise data relationships
- Implemented AI-powered proposal generation workflows
- Designed dynamic role-based workflow systems

10/2024 – 12/2024

To-Do Application (MEAN Stack)

- Built full-stack task management system using MongoDB, Express.js, Angular, Node.js
- Developed REST APIs and CRUD operations

07/2023 – 06/2024

IoT-based Child Safety Monitoring Gadget

- Developed IoT system with Machine Learning for real-time monitoring and alerts
- Implemented sensor-based data processing

Certificates

- Full stack developer certificate - kodnest institute
- Introduction to IoT – NPTEL
- Python for Machine Learning – Great Learning
- Ethical Hacking – Internshala

Education

06/2020 – 05/2024

B.Tech (AI&DS)

Coimbatore, India

Karpagam Academy of Higher Education

8.7 CGPA
